Treatment Tables

Vera E2

Professional examination table with adjustable height

This two-section table demonstrates the perfect combination of design and functionality for your clinic. The adjustable headrest offers a versatile and practical solution for any type of general examination, in both reclined and extended positions.

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera EP2

Professional Examination table with adjustable height and Trendelenburg

This two-section table perfectly combines functionality and design. The adjustable headrest and mid-section offer a practical and versatile solution for any type of general examination in reclined, extended, and Trendelenburg positions.

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- Piston controlled adjustable mid section with Trendelenburg position.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera E3

Professional examination table with adjustable height

Solid and functional 3-section table. Vera E3 is ideal for any type of examination in reclined, extended, or vertical positions.

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- Piston controlled adjustable leg support.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera M2

Professional examination table with adjustable height

Solid and functional 2-section table suitable for a wide range of manual therapy, massage, and diverse procedures in the examination of patients.

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- Ergonomic opening for the face in head support.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera M3

Professional examination table with adjustable height

Solid and functional 3-section table suitable for a wide range of techniques in manual therapy, massage, and diverse examination procedures.

Features

- Stable, safe and functional chassis.
- Motorised height regulation 53-95 cm.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- Ergonomic opening for the face in head support.
- Piston controlled adjustable leg support.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera M6

Professional massage treatment table with adjustable height

M6 is a fully equipped table designed for use in all types of massage and physiotherapy treatments. The retractable lateral supports allow professionals to get closer to the patient and apply greater force during treatments.

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- Headrest in 3 section with opening for face.
- Piston controlled adjustable leg support.
- Removable arm rests.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera T3

Professional massage treatment table with adjustable height

This 3-part treatment table combines functionality and design for your clinic. The adjustable headrest and leg support provide a versatile and practical solution for any type of therapy in a reclining, vertical, or sitting position.

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- Ergonomic, elongated opening for the face in head support
- Piston controlled leg support
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera TP3

Height adjustable treatment table with Trendelenburg

Sturdy and functional therapy and treatment table in 3-sections. Suitable for different positions: sitting, supine, lumbar manipulation techniques, and Trendelenburg position

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- Elongated opening for face in head rest.
- Piston controlled adjustable leg support.
- Piston controlled adjustable middle section with Trendelenburg position.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Vera TP5

Height adjustable treatment table with Trendelenburg

TP5 is a treatment table designed specifically for therapists who work with spinal cord treatments and other specialized fields.

Features

- Stable, safe and functional chassis.
- Motorised height regulation.
- Multifunction foot control with automatic zero position.
- Piston controlled adjustable headrest.
- 3 part head rest with elongated opening for face.
- Piston controlled adjustable leg support.
- Piston controlled adjustable middle section with Trendelenburg position.
- High density foam upholstery.
- Steel structure in high gloss finish.
- Maximum lifting capacity: 220 kg.
- Wide range of accessories.
- Optimum designed base allowing ease of access from any angle.

Stability and durability

Sturdy, reinforced steel chassis provides dynamic stability that reacts to any sudden weight changes caused by either the patient or practitioner during treatment.

High Performance and Control

Low-noise durable and powerful actuators, with high speed/ high performance and mechanical endstop for first failure safety. This makes it the right choice for the future.

STABILUS Variable Positioning

A special piston / valve system, which separates the two pressure chambers in the spring, allows effortless movement and locking.

Details make the difference

Passion for Quality Made in Spain.

It's just a small thing that most people wouldn't notice, but it's a detail worth noting in the quest for outstanding quality and durability.

Highlights

Confort

Combining both maximum comfort and support, this treatment table features extra thick foam finished in high-quality vinyl upholstery, providing smooth, silent, and reliable electrical movements. The practical width of the upholstery is 100%.

Hygiene

All exposed parts are easily cleaned, and being upholstered in SKAI® allows for easy cleaning and disinfection.

Safety

The sturdy and reinforced steel chassis offers dynamic stability that responds to sudden weight changes caused by the patient or the practitioner during treatment. The self-lubricating, cushioned bearings not only enhance the durability of the table but also provide a smooth operation.

Accessibility

The H-shaped frame design provides maximum accessibility during treatments, with a 53 cm floor-to-table distance for easy patient access.

Vera Optional Accessories

Autoblock

Mechanized centralized locking system with 4 double rotation castors allows for easy maneuverability over short distances with 50mm wheels.

Hand Switch

Sensitive and very easy to use control (Optional).

Face hole plug

Provides support and comfort when the treatment requires.

Paper Roll Holder

Ergonomic paper support, easy to fix paper (maximum length 50cm - Ø 12,5 cm)

Dama

Design, Reliability and Comfort

Treatment beds are an essential part of a practice and should be the focal point of every clinic.

More than just a necessary piece of equipment, Dama represents an investment in quality, technology, and comfort to your patients. It's the opportunity for your clinic to enhance efficiency and expand treatment solutions, differentiating your practice and clearing the way for profit growth.

Design: The design features are augmented by a highly original color concept. This means that you can explore new avenues in interior design and harmoniously integrate the Dama treatment chair into your clinic. So let yourself be inspired and select your combination.

Reliability: 100% made in Barcelona - Spain. The electronics with SMT technology and the base, seat, back support and leg support are backed up by low tension, silent and reliable equipment.

Comfort: The non-slip upholstery, soft padding and ergonomic lines have been designed to provide maximum comfort to the patient.

Sena

An attractive design with an excellent result

With Dama base the Sena multi-treatment chair offers a new dimension to work: reliability and efficiency at an affordable price.

Easy to operate, safe and economic functioning. This multi-treatment couch allows an easy, versatile work pattern.

Design, comfort and reliability are the main features of this SENA multi-treatment couch. The electronics with SMT (Surface Mounting Technology) and the base, seat, back support and leg support are backed up by low tension, silent and reliable equipment.

The non-slip upholstery, soft padding and ergonomic lines have been designed to provide maximum comfort to the patient.

Namrol multifunctional chairs have been designed for all types of beauty treatments, Dermatology, facials, body treatments, hair removal, make-up, tattoos and even massage.

Ideal for any treatment

Cushioned armrests synchronised with the back support, both retractable independently.

Sturdy and comfortable table position to offer a wide range of treatments.

Minimum height from the floor and removable armrests, ensure ease of access for the patient.

Ergonomics and unlimited comfort

The adjustable chair movements, ensure ergonomic working in any position of treatment.

Details make the difference

Passion for Quality Made in Spain.

It's just a small thing that most people wouldn't notice, but it's a detail worth noting in the quest for outstanding quality and durability.

Highlights

Extendible Head Support

Head support is adjustable both in angle and height, keeping the head steady and a correct position.

Hands free operation

The foot switch is your multifunctional control element for all chair functions. Include home position and two memory positions that you customize to your needs.

Extendible Leg Support

Split extendible legrest, easy to position allows quick and easy adjustments.

Syncro

The legrest raises and lowers in accordance with the backrest. This synchronised movement means the patient is comfortable while the backrest is being adjusted. The Trendelenburg is an asset for safety and comfort.

Dama Optional Accessories

Massage Headrest

Massage cushion can be easily swapped with the standard headrest in just a few seconds. The 3D adjustment feature allows for a better and more comfortable position.

Thermo heating system

Chair heating system with 3 temperature settings. The chair heating is especially pleasant for the client, and also energy saving, because the temperature in the salon can be set a few degrees lower. (Option not valid for Sena)

Paper Roll Holder

Placed at the rear part of the backrest with quick swap of paper rolls. (max. roll length 60 cm, Ø 12,5 cm)

Manicure Bowl

Manicure bowl with ergonomic support.

Dama

Optional Accessories

Protection Screen

Protection screen can be attached to either side of the chair.

Magnifying lamp support

Chair side mount magnifying lamp support. Synchronized raising and lowering movement with the chair.

Scalytic lamp support

Chair side mount scalytic lamp support with synchronized raising and lowering movement with the chair.

Castors Set

Locking casters provide mobility without sacrificing valuable floor space. Castors add 3 cm. to the minimum seat height.

Protective Cover

Keeps your chair looking clean and new, protecting the upholstery from the rigors of frequent cleaning.

Hand control

The Dama handset has an ergonomic design and size, featuring large buttons that blend together to create a user-friendly device. It also includes a hook for placement on the bed.

Wireless Foot Control

Enjoy the freedom of locating the foot control anywhere in the room. Remove cords and eliminate obstacles.

Lena Tricobed Gyneris Prisma

The most
essential piece
of equipment in
your practice

Examination & Treatment Chairs

Lena

Mobile, stable, and secure.

Ideal for Dialysis, Chemotherapy or Blood Sampling.

Namrol introduces a new line of state-of-the-art therapy couches for dialysis treatment. The innovative design is based on the latest healthcare research and direct feedback from dialysis centers worldwide.

Patient comfort, ergonomic design, and efficiency are the top priorities of this new generation of therapy couches. The couches are engineered to provide a comfortable experience for extended haemodialysis sessions while maintaining a high level of hygiene.

They feature advanced motorised movements with 4 motors to quickly and seamlessly adjust to the required positions, while the flexible and patient-friendly armrests provide superior ergonomic support in different positions.

LENA 4 motors dialysis chair delivers exceptional comfort for sitting or lying down in any position. It effortlessly transitions between sitting, relaxing, sleeping, and even emergency Trendelenburg positions, thanks to its swift and seamless button-operated movements.

The Namrol design approach simplifies the process of adjusting the powerful motors, which can reposition the backrest, seat, leg section, and footrest, as well as raise or lower the chair's starting height from 54 cm, making it an easy-to-use option for both caregivers and patients.

Comfort, ergonomics and functionality

Lena encapsulates the best solution in ergonomics and mobility to meet the high expectations of the patient and the healthcare professional.

Chair side mount surgical lamp support. Synchronized raising and lowering movement with the chair.

Thermo heating system

Chair heating system with 3 temperature settings. The chair heating is especially pleasant for the client, and also energy saving, because the temperature in the clinic can be set a few degrees lower.

Round headrest

Designed to provide a comfortable and relaxed position for patients during procedures. Its unique design allows for easy adjustments and features a soft, supportive cushion.

Castors Set

Locking casters provide mobility without sacrificing valuable floor space. Casters add 3 cm. to the minimum seat height.

Hand control

The Tricobed handset has an ergonomic design and size and features large buttons all blending in to a user-friendly handset. Hook for placement on the bed.

Paper Roll Holder

Placed at the rear part of the backrest with quick swap of paper rolls. (max. roll length 60 cm, Ø 12,5 cm)

Ergonomics and unlimited comfort

The adjustable chair movements, ensure ergonomic working in any position of treatment.

Sturdy and comfortable table position to offer a wide range of treatments.

With a well thought out upholstery and a back support of ample width for patients shoulders, maximum comfort is achieved.

Minimum height from the floor and removable armrests, ensure ease of access for the patient.

Cushioned armrests synchronised with the back support, both retractible independently.

Posición

Powered base, back and tilt for effortless positioning.

Antitip

The anti-tip system helps prevent movement when the patient enters and exits the chair, or during the treatment.

Trendelenburg

The Trendelenburg is an asset for safety and comfort.

Standing treatment

Maximum height of 95 cm allows you to work standing if desired.

Seated treatment

Small base footprint which takes up less space in treatment room.

Gyneris

Advanced features and optimal functionality

The Gyneris stands out as a superior option in its class due to its exceptional combination of optimized functionality, first-rate comfort, and elegant design. It was designed to establish new benchmarks for daily medical practice and clinical applications.

With Gyneris at the center of your practice, you can provide your patients with better examinations. The innovation class offers every option for a modern, integrated workflow, with high comfort for both the professional and patient, resulting in superior results. With Gyneris, you can concentrate entirely on your patients, as the chair allows for fast and easy patient positioning. Its stepless electrical adjustment feature enables quick attainment of various examination positions.

The chair is upholstered in treated polyurethane and has high-density padding for great comfort and durability. It features 3 motors, automatic memory reset, and is completely programmable, allowing it to assume any position and height. Due to these movements, professionals can carry out their work in complete comfort. The retractable footrest allows patients to feel entirely comfortable during the examination.

Investing in the Gyneris chair means investing in the well-being of your patients and the efficiency of your practice. Upgrade to our innovation class and experience the ultimate in examination comfort, convenience, and quality.

Functionality, safety and reliability

Chair for gynecological examination, that provide optimal functionality, safety and reliability during the examination.

Horizontal positioning for ultrasound examination. It allows for space saving in the clinic and reduces examination time.

Adjustable positions and large work surface that allows the professional to carry out examination in a comfortable way.

Upholstered armrests with raising/lowering synchronised with backrest, independently retractible.

Its low starting height of 530 mm makes it perfect for getting on conveniently and easily without a mounting step.

Prisma

Design and versatility, the principal features

Multifunctional chair suitable for a wide range of uses such as diagnosis, examination, orthodonty, blood analysis, dermatology.

Our examination chair is the ideal partner for doctors and patients alike. Its smooth, electrically-controlled movements, combined with treated, high-quality polyurethane, offer comfort and durability that are essential in a medical setting.

This chair is the main tool of your practice, with its high-density padding upholstered in treated polyurethane that provides both comfort and durability. Its three motors, automatic memory reset, and fully programmable positions allow for flexibility and customization to fit the needs of both the patient and the professional. This makes it easy for the clinician to perform their work with complete comfort, while also ensuring that the patient is comfortable throughout the examination process.

The retractable footrest is another feature that sets our examination chair apart, providing patients with additional comfort during their examination. This feature ensures that patients are able to fully relax during their examination, which can be especially important in certain medical procedures.

Overall, our examination chair is a reliable and versatile tool that can help medical professionals provide the highest level of care to their patients.

Versatility, functionality and ergonomics

With its exhaustive design, it provides a versatile solution for a wide range of work and useful in treatments that require the patient to remain in a set position.

Anatomic lumbar backrest for a relaxing and comfortable examination which helps save space in the clinic and reduce examination time.

Ample leg support with piston controlled elevation.

Upholstered armrests synchronised with the adjustment of the backrest (both can be let down independently).

Minimum height from the floor and removable armrests, ensure ease of access for the patient.
