3.Precautions

Read this manual carefully before installation, operation and adjustment, and please keep it well.

This electric beauty bed is equipped with a three-wire power cord. The power cord must be plugged into an three-hole outlet which is properly installed and grounded. This is not only to prevent the risk of electric shock, but also ensure bed work properly.

When adjusting the backrest, seat cushion, footrest or lifting of the whole bed by manual controller or foot control switch, please keep your hands, feet and head away from the position①②③④showed on below photo to avoid getting jammed.

While controlling the lifting of the whole bed, the button must be pressed continuously until the bed be in a suitable position.

Please pay attention that the input frequency should be $Ms \times 6min/h$ when operating the motor.

Maintenance should be processed by trained professionals.

Please use neutral reagent to clear the dust, stains on leather or on plastic cover after each treatment.

This electric beauty bed is suitable for beauty and massage treatment.

4. Structure of electric spa bed

This beauty bed consists of four motor controller box, motor, hardware, plastic parts and PU leather. Among them, the controller box is controlling the operation of four motors and hand controller.

This beauty bed includes angle adjustment of the backrest, angle adjustment of seat cushion, angle adjustment of footrest and lifting adjustment of whole bed which is an overall and integral structure. (Details as shown below)

- ① Angle adjustment of the backrest
- ② Adjustment of the whole bed height
- ③ Angle adjustment of the footrest

5.Installation

① Put the bed to a proper location, according to the overall layout, the daylighting or artificial lightings and operation condition of the salon's or home. And keep it in the clean, dry and cool operating environment.

② Open the packing carton to check if the bed is intact and see if the accessories or spares are complete. Kindly contact distributor or manufacturer if any problem.

③ Place the bed to the proper position. Please note that it is unnecessary to install extra screw on the floor to fasten the bed, because the original design has take the stability performance into consideration. But please ensure the bed is placed on a firm and flat ground, so as to prevent any accident. If the bed rotates or slant due to rough ground, you could adjust the four pieces of plastic feet (M10×30) and nuts (M10) by hexagon open-end wrench, which are fasten on the bottom panel, so as to ensure the bed is stable.

④ Power Input: Voltage and frequency input shall be AC 100-120V/60Hz, 220-240V/ 50Hz. Plug the bed on the power supply properly.

6.Operation instruction

7. Technical Parameters

Product size	1980(L) ×770(W) ×680/880(H) mm (±2%)
Package size	2020×810×730mm
The highest position	880±10mm
The lowest position	680±10mm
Net weight	105 kg
Gross weight	125 kg
Power	AC 100～120V ,50Hz/60Hz or AC 220～240V , 50Hz/60Hz optional
Backrest adjustment	0°～+64° (±10%)
Footrest adjustment	-25°～0° (±10%)
Tilt adjustment	15° (±10%)
Armrest adjustment height	150mm
Lifting rated load	200kg

8.Maintenance

After every treatment, please use neutral reagent to clear the dust, stains on leather or the plastic cover. This is to prevent premature aging of the leather and plastic cover.

9.Circuit system connection

AC 100-120V ,50Hz/60Hz or AC 220-240V ,50Hz/60Hz

10.Troubleshooting

Problems	Reason	Solution
Can't go up or down normally	The power cord is unconnected or not well plugged	Connect the power cord or plug it well
	Poor quality of manual controller	Replace the manual control panel
